

The diagram shows a rectangular page layout with three nested borders. The outermost border is black, representing the bleed line. The middle border is red, representing the crop line. The innermost border is cyan, representing the safe zone. A horizontal dashed orange line is positioned in the lower half of the page, indicating a fold line. Arrows point from the text to the corresponding lines.

Black line is Bleed line for file

Red Line is where your job gets cut

Everything inside the blue line is safe

INSIDE FRONT

Fold

INSIDE BACK

File size with bleed should be 3.625 x 4.125
