

The diagram shows a rectangular layout with three nested borders. The outermost border is black, representing the bleed line. The middle border is red, representing the crop line. The innermost border is cyan, representing the safe zone. A horizontal dashed orange line is positioned in the lower half of the page, indicating a fold line. The word 'BACK' is centered in the upper half, and 'FRONT' is centered in the lower half. Arrows point from the text to the corresponding lines: a black arrow for the bleed line, a red arrow for the crop line, and a cyan arrow for the safe zone.

Black line is Bleed line for file

Red Line is where your job gets cut

Everything inside the blue line is safe

BACK

Fold

FRONT

File size with bleed should be 3.625 x 4.125
